Explore New Frontiers In LABORATORY MEDICINE

William Osler Health System (Osler) is one of the largest networks of community hospitals in Ontario, comprised of two acute care hospitals - Etobicoke General and Brampton Civic – as well as Peel Memorial in Brampton, which has recently been redeveloped and is now known as the Peel Memorial Centre for Integrated Health and Wellness. Osler offers a wide range of health services, with care provided by skilled health professionals working in multidisciplinary teams. Osler’s commitment to the community is to provide healthcare in a manner that puts patients and their families first.

We are seeking two Anatomic or General Pathologists to join a Laboratory Medical team that includes 12 Anatomic Pathologists, and one full-time Hematopathologist. Subspecialty fellowship training is preferred. There is an immediate need for an Anatomic or General Pathologist with an interest in renal pathology, to support medical renal biopsy sign-out, due to an impending vacancy. Other areas of interest include head and neck, pulmonary, gastrointestinal and liver, and molecular pathology, though fellowship training is not essential, and otherwise strong candidates will also be considered. Both new graduates and candidates with experience in clinical practice are invited to apply. The successful applicant must be licensed to practice in Ontario and have Royal College certification in Anatomical or General Pathology, or equivalent certification. Our department is busy, with a case mix weighted towards complexity, an ideal opportunity for a pathologist wanting to grow their career.

If you are interested in joining our team as well as working in an organization that is poised for tremendous growth and development, please forward your curriculum vitae and a letter of interest to:
