Locum Anatomic Pathologist  
St. Joseph’s Healthcare, Hamilton

Applications are invited for a short-term full-time or part-time Locum Anatomical Pathologist position at the St. Joseph’s Healthcare Site of the Hamilton Regional Laboratory Medicine Program (HRLMP). This position would be ideal for either an experienced pathologist working part-time in another institution or a recently retired pathologist.

St. Joseph’s Healthcare is a large tertiary care general teaching hospital with a high but interesting volume of surgical pathology and diagnostic cytopathology. St. Joseph’s Healthcare supports regional programs in respiratory medicine, thoracic surgery, head and neck surgery, and is the site for the Regional Renal Transplantation Program and Urology Institute. It also has busy general surgery and gastroenterology services. Experience in surgical pathology and cytology is a prerequisite. Expertise or interest in breast or renal pathology would be a definite asset. The successful candidate will be sharing the service workload with a group of nine Anatomical Pathologists.

Applicants must hold, or be eligible for, Royal College of Physicians and Surgeons of Canada certification in Anatomical or General Pathology and be eligible for medical licensure in the Province of Ontario.

Interested qualified candidates are invited to submit a cover letter, curriculum vitae and the names and addresses of three referees to:

Vina Alexopoulou, MD, FRCPC  
Discipline Director, Anatomical Pathology  
Hamilton Regional Laboratory Medicine Program  
Email: barko@hhsc.ca  
Phone: 905 521-2100, Ext. 76295  
FAX: 905 577-0198

All interested and qualified candidates are encouraged to apply; however, Canadians and permanent residents will be given priority. Hamilton Regional Laboratory Medicine Program is committed to employment equity and welcomes applications from all qualified persons. The positions will remain open until filled.
