Academic Pathologist

Sunnybrook Health Sciences Centre is an academic health sciences centre fully affiliated with the University of Toronto and a major teaching hospital within the Toronto Academic Health Sciences Network, training 5,000 student learners from over thirty health disciplines including 1,300 residents and fellows per year. We are inviting applications for the position of an Academic Pathologist, Clinician Teacher stream, at the rank of Assistant, Associate or full Professor. The candidate must possess strong diagnostic expertise in gastrointestinal pathology and lymphoma pathology, with competence more broadly in the diagnosis and reporting of other surgical pathology specimen types. Strong experience in the development, validation, and implementation of clinical molecular/cytogenetic tests is also desired, and formal certification in molecular pathology and/or cytogenetics (e.g. FCCMG or equivalent) would be an asset. The applicant must possess a medical degree and hold Royal College of Physicians and Surgeons of Canada certification in Anatomical Pathology, or equivalent, and be eligible for an independent license by the College of Physicians and Surgeons of Ontario.

The Division of Anatomic Pathology in the Department of Laboratory Medicine and Molecular Diagnostics at Sunnybrook is a collegial, inter-professional team comprised of 17 pathologists and 50 combined pathology assistants, technologists, research and administrative staff. Our Division is a fast-paced and efficient environment. Through our affiliation with the Odette Cancer Centre, we handle primary diagnosis and/or second reviews of complex malignant cases, with more than 30,000 surgical pathology and 20,000 cytopathology specimens per year. We pride ourselves on provision of pathology results that are accurate, timely and integrated into Sunnybrook’s clinical programs “When it matters most”. The successful applicant will thrive in an inter-professional oncology team, including participation in multi-disciplinary tumour boards and support of collaborative research. Responsibilities will include academic clinical practice in gastrointestinal and lymphoma pathology, with participation in frozen section, autopsy, and on-call coverage on a rotational basis; participation in the development, implementation and reporting of molecular diagnostic/cytogenetics tests; and educational and administrative duties as required by the Chief of the Department.

The successful candidate will receive an academic appointment in the Department of Laboratory Medicine and Pathobiology at the University of Toronto, with rank commensurate with qualifications and experience, and will help foster excellence in academic pathology through active participation in the educational and research activities of the Sunnybrook and University Departments. For more information about the Department of Laboratory Medicine and Pathobiology at the University of Toronto, please visit www.lmp.utoronto.ca.

Salary and benefits are in accordance with the Uniform Minimum Level of Compensation (UMLC) for pathologists in the Province of Ontario (currently $359,432/annum).

The Search Committee will consider applications received by September 30, 2019. Only short-listed applicants will be contacted. The proposed start date for the position is January 1, 2020, or as mutually agreed upon.

Sunnybrook Health Sciences Centre and the University of Toronto are strongly committed to diversity within its community and especially welcome applications from racialized persons/ persons of colour, women, Indigenous/Aboriginal Peoples of North America, persons with disabilities, LGBTQ persons, and others who may contribute to the further diversification of ideas.

All qualified candidates are encouraged to apply; however, Canadians and permanent residents will be given priority.

Interested applicants should include with their application: C.V., a brief statement of career plans, and the names of three references, to be sent to:
